

DIGITAL BEDROCK

Media and Entertainment Industries

We offer the most comprehensive, secure, and efficient long-term digital asset preservation available for professionals in the media and entertainment industries at a competitive price.

- We understand that media fragmentation with platform-agnostic content requires an unprecedented focus on security, which we offer in a safe unhackable environment that mirrors MPAA standards.
 - We are your staff and infrastructure, so large-scale enterprise investments and hardware purchases are unnecessary.
 - We monitor your assets' health through pro-active fixity checks to ensure data integrity, and monitor format and software obsolescence. We notify you when your content is endangered for obsolescence, and work with you to find a solution.
 - We implement a storage infrastructure applying green technologies to ensure that your data remains earth-friendly.
- 

Digital Bedrock is your data insurance policy to protect valued digital assets.

- We protect your digital content through secure, managed, and trusted digital preservation.
- We create complex metadata about an asset's characteristics and dependencies and monitor its health over time.
- We are not an anonymous cloud storage service. You will know the people working directly with you.
- We operate on a closed network in an ISO 27001 certified data center; at no time are your master files ever online.

WORKING WITH US IS EASY!

- Step 1.** Select and package your files using our self-curation tool.
- Step 2.** Digital Bedrock analyzes your data, identifies long-term vulnerabilities, and performs health and obsolescence checks.
- Step 3.** Offline replication in three locations, secure storage, and monitoring to keep your digital content viable and accessible over the long term.

ADDITIONAL SERVICES:

- File migration to new media
- Checksum creation and verification
- LTO, Turtle case, G-Tech and LaCie hard drive reseller
- Consulting: digital preservation planning, metadata audits, assessments, collection cataloging services
