

MEDIA PRESERVATION SOLUTIONS

The content captured in audio-visual media represents our collective cultural heritage. Unfortunately, much of this content is at risk of being lost to future generations due to the degradation and obsolescence of aging storage media and recording technology. Iron Mountain Entertainment Services (IMES) archivists serve our clients as stewards of these priceless assets, ensuring that the audiences of both today and tomorrow will always be able to enjoy them. You can rest easy knowing that with IMES' industry-leading media preservation solutions and techniques, your irreplaceable content is safe, secure, and most importantly, accessible and playable whenever you need it.

OUR END-TO-END MEDIA PRESERVATION SERVICES INCLUDE:

- **Secure Logistics & Climate-Appropriate Storage, on a Global Scale:** Point-to-point media-appropriate archival storage conditions ensure safe, secure, and discreet handling of client media and digital content.
- **Inventory Discovery & Management:** Media inventory evaluation, triage, research, content verification, metadata collection, barcoding, imaging, database services are customized to the specific needs of every client.
- **Remediation and Restoration:** Media degradation occurs in a variety of forms, irrespective of storage conditions. Common problems include physical damage, decomposition, proprietary systems and format obsolescence. The IMES Media Recovery Technology team specializes in recovery of content deemed beyond salvage.
- **Hard Drive Preservation:** Hard drives are among the most fragile storage formats and considered a top priority for migration by media archivists worldwide. The IMES hard drive preservation service offering includes drive health check, disk recovery, data migration, backup, sync, content curation, and future-proof open format digital archiving.
- **Digital Transformation:** All production is done in-house in our fully-equipped studios, allowing us to maintain a chain of custody throughout every phase of production. Clients' physical media inventory never leaves the security of Iron Mountain's facilities for digital preservation, remediation or complementary services.
- **Secure Digital Preservation and Distribution:** IMES media preservation solutions make your invaluable archived content accessible and usable. Powerful digital archiving and digital asset management options are available including our secure Digital Archive (DCR), Media Asset Management (MAM), and AI/ML Content Enrichment Platform.
