## Tuscan Archival Products

- Tuscan offers a full range of 16mm and 35mm ProVent sizes for protected storage of film from 400 ft. – 2000 ft.
- ProVent™: Designed for Professional Vaults is the film can of the future.
- Proper ventilation is paramount for the maximum lifespan of your film collection.
- Ventilation slots serve as parallel entry and exit points to facilitate air exchange
- Raised ribs on the floor of the container actively direct airflow evenly, under and around the film, while also providing solid support to avoid edge distortion
- A heightened cover allows air space above the film.
- The chemically inert polypropylene used on the cans restricts off-gassing.
- All products have been independently tested and passed PAT - Photographic Activity Test.

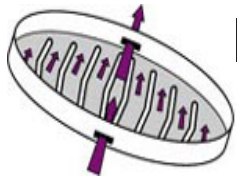

ISO   
9001:2015  
REGISTERED

- As the largest archival container provider in the country and the only U.S. manufacturer, Tuscan's proprietary ProVent™ design achieves premium film preservation better than anything else.
- Tuscan manufactures according to standards set by ANSI, AIIM, ISO and SMPTE organizations in order to create the highest quality product line that is consistent and compatible with the industry.
- Whether you're a film studio, university archive, film lab, post-production house, government agency or corporation, Tuscan is the perfect solution with our ingenious design, rapid turnaround and a great price point.

# Innovative ProVent Design

- ProVent's actively ventilated design significantly improves airflow under the film – greatly reducing acetic acid levels and extending the lifespan of the film.
- ProVent cans are built with raised ribs to provide solid and even support throughout the film roll, thereby preventing film sagging and edge distortion that can come from platform designs.
- The ProVent's 360-degree stacking feature makes both stacking and unstacking a much less labor-intensive process.
- ProVent containers are sized to industry standards for maximum efficiency and can stack right alongside standard metal cans if needed.
- The finish on the ProVent can is smooth and suitable for long-term label adhesion, with a 4 in. or greater diameter in the center of the lid and 360 degrees of unobstructed space on the rim.

The biggest names in film trust Tuscan Archival.
