

## Good Air In, Bad Air Out

- Revolutionary design promotes active ventilation
- Vent slots on sidewalls facilitate air exchange
- Channeled interior flow directs airflow under and around film -without edge distortion
- Chemically inert polypropylene restricts off-gassing
- Store full range of 16mm and 35mm sizes 400ft 2000ft
- Convenient nesting rings ensure stable stacking
- Entire sidewall accepts standard labeling
- Industry standard sizing maximizes vault space
- Compatible sizes allow stacking with standard metal cans
- Independently tested and passed Photographic Activity Test
- Polypropylene cores complete your archival storage solution

## Prolong. Protect. Provent.
